

Kombi K

Kombi V

Clever shoe support

MADE TO LAST: GLIDING SHOES FOR LONG-TERM USE.

For ideal plowing: Protects the roadway and reduces noise

Küper developed the Kombi K and Kombi V gliding shoes for all types of snowplows which use a shoe for support. These feature a cast iron casing, rubber and ceramic or hard metal, making them far more durable than standard cast iron shoes. The materials and composition of the gliding shoes correspond to that of the Küper snowplow blades. When used together, this combination offers far superior durability.

Durability Shoes

Durability Snowplow blades

+ 30 %

Kombi S

(+ cast iron shoe)

Kombi S

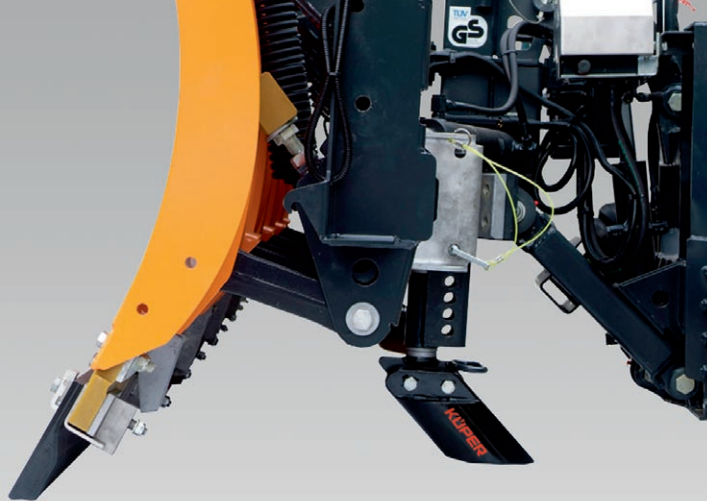

(+ Kombi K)

Far superior durability: The Küper Kombi K lasts 300% longer than conventional cast iron shoes.

The Kombi K gliding shoe wears evenly when used with Küper Kombi S snowplow blades. As a result, this combination lasts 30% longer than with conventional cast iron shoes.

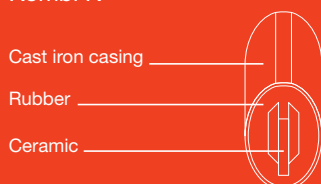

Functions

- High-quality gliding shoe made of cast-iron, rubber and wear-resistant ceramic
- Kombi K wears evenly when used with Kombi S snowplow blades
- Kombi V is also available with a tungsten carbide inlay for use with the Küper Tuca SX blade
- Very long service life
- For all snowplows with shoe support

Materials

Kombi K

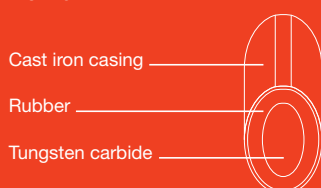

Rubber

These grades of rubber were developed especially for extreme road requirements. They are extremely wear-resistant, flexible and elastic to adapt effectively to the surface of the road.

Corundum ceramic

The second-hardest mineral in the oxide category. It is especially suited for use as an inlay in highly abrasion-resistant snowplow blades. Ceramic moulded parts are produced specifically for our various types of blades.

Kombi V

Tungsten carbide

A hard metal which consists of the elements tungsten and carbon. It is characterised by its extreme hardness, which is close to that of a diamond. This material stands up to the toughest loads.

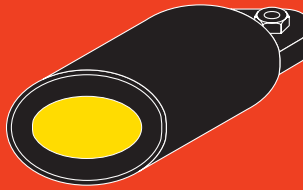

Technology

Kombi S + Kombi K

The Kombi K shoe and Kombi S snowplow blade have corresponding material compositions. Using them together guarantees the greatest possible durability.

Tuca SX Wave + Kombi V

The Kombi V shoe and Tuca SX Wave snowplow blade have corresponding material compositions. Using them together guarantees the greatest possible durability.
